ARISE Stool

DESIGN
JENS KAJUS & CLAUS JAKOBSEN
ARISE STOOL, 2016
ARISE Stool

ARISE Stool is the extra seat you can pull out when people drop in; the stool you step on to reach the top shelf; the side table you use when you need to drop stuff; it's the flexible seating solution with chair-like qualities that makes those who own it wonder how they ever lived without it.

A stool with chair-like qualities, it’s as suited to adults – who can sit comfortably resting one foot on the step – as to children, who use it to climb on, play at or sit on as an attached table and chair.

Though obviously functional, ARISE Stool’s construction of two stacked steps also shows its playful side. It has a graphic expression that’s solid yet light, thanks to its combination of solid oak material and softly rounded edges.

### Dimensions
